

Job Title	3D Content Creator - Intern
Reports to	Team Leader: Cherif Redissi, CIO

Company Description

Onboard is a fast-growing startup leading the way to paper-free industries. Founded in 2018, we provide a SaaS platform to help hardware makers transform their product manuals to user-centric 3D manuals, with instant customer support and insights.

Job Description

The ideal candidates will thrive in a challenging, fast paced agile work environment requiring resilience, team collaboration, open communication, and a passion for learning and crafting cool 3D content.

You will be creating product manuals on our platform. That requires:

- Searching for CAD Models of products
- Converting them to the formats supported by our platform.
- Creating the product manual using the features on our platform.

Qualifications

Technical Skills needed:

- Experience working with **at least one out of these software: Solidworks/Catia/3DS Max/Blender**
- Interest in and ability to learn new technologies on-the-job.
- Ability to present and document any work/research done.

Technical Skills optional:

- Knowledge of computer graphics' concepts (UVs, normals, etc...)

Soft skills needed:

- Ability to communicate professionally and effectively with project stakeholders
- English Proficiency
- French Proficiency
- Industry and Mixed Reality enthusiast

Benefits:

- Be part of cutting edge technologies product Team
- Work in a fast-scaling start-up with great flexibility and great autonomy with a short decision-making circuit.
- Enjoy an OPEN startup mindset
