

Naviacom

Marketing & Public Relations

Naviacom is hiring a Marketing & Public Relations Intern to tell powerful stories enabling people to understand Naviacom's mission and products.

During the internship mission, the candidate should focus on insights, strategies, and executions within our product, B2B, or brand marketing team. The candidate should also develop external communications strategies to captivate global audiences through compelling written and visual media.

Duration: 4-6 months

Engineering: Development of Eco-Driving Module for Fleet Management Solution.

The goal is to extend a fleet management platform by developing an eco-safety driving module based on the data we gather from the GPS trackers and the on-board computers.

The candidate should analyze the extracted data, define a penalty matrix and develop a ranking and scoring algorithms.

This module should provide driver scoring on the three most important aspects of driving: performance, compliance and safety.

Methodologies: Scrum/Kanban

Technologies: Angular.js, Bootstrap, Kafka, Flink and Laravel.

Duration: 4-6 months

Engineering: BigData for anomaly detection and recommendation

The goal is to extend a fleet management platform by integrating BigData features. Some of the areas we want to explore are: Congestion Detection, Generating heat maps, Optimizing maintenance and other fleet operations ... etc.

Methodologies: Scrum/Kanban

Technologies: Kafka, Flink, FlinkML and OpenSource bricks.

Duration : 4-6 months.
