Web Developement&/or App Mobile – INTERNSHIP

Presentation of the Startup

Farm Trust isa startup thataims to eliminate the use of intermediaries by farmers for the sale of theirfood. By deliveringorganic fruit and vegetablesdirectly to your home, Farm Trust facilitates transactions betweenfarmers and consumers. This way, farmerscanincreasetheirincome and consumers have the opportunity to benefitfromfreshproduceatlowercosts.

In order to ensurethat the fruits and vegetablesdelivered are free of pesticides or GMOs, Farm Trust purchasesfromcertifiedorganizations or checks in itslaboratory the toxicitylevel of eachfoodpurchasedfromsmallproducers. In thisway, consumersreceive the mostnaturalproducts possible.

In itsevolution and innovation efforts, Farm Trust plans to implement a blockchain system to improve the traceability of itsproducts. Wealsoaim to create a mobile application, and improveourlogistics. In the long term, Farm Trust also plans to use artificial intelligence (through computer vision and learningalgorithms) to monitor crop and soilhealth.
